AvaTax Connector for QuickBooks Desktop
<Intuit QuickBooks Release v1.00.93.00v2>

Intuit QuickBooks Release v1.00.93.00v2

Take new SDK update and add them as reference in EventCallBackLib project.

Create new branch from master branch which has latest merged code till 92.02v2 and then it should include the appropriate SDK reference.

AvaTax for QuickBooks desktop code changed for following:

ID	Name
	AddressValidator.vb

File Name	Function Name	Code Changes
AddressValidator.vb	<p>SetAddressInformation</p> <p>SetAddressInformationWithLatLong</p>	<p>Added below code:</p> <pre> If objValidateResult.validatedAddresses(0).latitude IsNot Nothing Then .SetLatitude(objValidateResult.validatedAddresses(0).latitude) End If If objValidateResult.validatedAddresses(0).longitude IsNot Nothing Then .SetLongitude(objValidateResult.validatedAddresses(0).longitude) End If </pre>
